Introduction

ATC group is one of the largest global companies, engaged in production, trading, and marketing various commodities.

Our operations are supported by linked offices worldwide.

Our core business activity is **trading**. We trade a lot of commodities such as grain, minerals, chemicals, steel, oil, and all the related products as soon as possible.

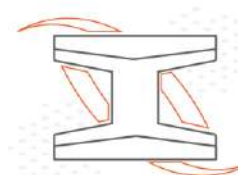

Our Business

Agriculture

**Project &
Investment Consulting**

**Steel
& Metals**

**Minerals
& Chemicals**

Logisitics

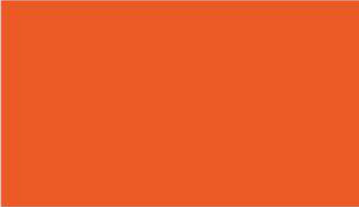

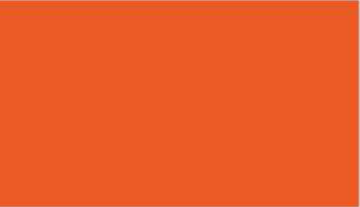

Energy & Oil

**IT &
Solution**

Agriculture

The ATC is engaged in **trading all agricultural commodities domestically and globally**, including food and feed grains, oilseeds, wheat, barley, corn, and other various products, such as pistachios, dates, raisins, edible oils, and peanuts.

Agriculture

Global Partnership

Although ATC's main business partners are **Germany, China, Switzerland** for Iran market in grains and oil seeds production, we welcome cooperation with companies all over the world to provide a wide range of agricultural products for our customers. We also import grains and oilseed from:

- Canada
- South America
- India
- China
- Australia

Agriculture

Business Unit

Grains and Oilseeds

The ATC handles products directly in Russia, Ukraine, and Kazakhstan and trades a wide variety of agriproducts including:

- Food: Wheat, Barley, Corn, Coffee, Soybean
- Feed: Barley, Corn, Wheat, Soybean Meal, Sunflower Seed
- Oilseed: Sunflower Seed, Soybean, Rapeseeds
- Edible Oils: Sunflower Seed Oil, Soybean Oil, Corn Oil, Rapeseed Oil (Canola)

Dried Fruit and Nuts

The ATC has been involved in providing high quality nuts and dried fruit. Iran has always been the top exporter of pistachio. We produce and trade it globally.

Major products:

Pistachios, Dates, Raisins

Agriculture

Assets

Through the following assets, the ATC has made trading quicker and more reliable:

5000 MT Grain Silos for storing wheat, barley, and corn with the ability to maintain quality for a long time in Anzali.

Ship unloader, **Multiport M 2000-25-GF-GS**, which is bought from NEURO Industrietechnik (Für Förderanlagen) GmbH, can unload 300 tons per hour in order to focus on fast distribution strategies for our valuable clients.

Edible Oil tank, with the capacity of 6000 tons, for storing crude oils to unload directly from vessel to the tank by 1500 meters pipe line.

The ATC's assets have enabled the company to perform different operations related to agribusiness and try to respond the global grain demand in a flexible way. We have strong presence in collaboration and business partnership with international companies and manufacturers.

Agriculture

Our Strength

The ATC has great capability in providing products domestically and globally. This strength has been the result of:

- Reliable logistics
- Professional team of experts and engineers
- United networks
- Marketing sales

Through these strength points, we have been a leading company among the others in steel distribution market.

The ATC has been exporting and distributing steel products to its target markets including Iran (where steel consumption is more than England and France), Afghanistan, Turkey, and Persian Gulf countries. While we plan to enhance our business trades and performance with existing partners, we also intend to collaborate with other new partners to develop operations in other reliable markets around the world. We will carry on expanding our business globally.

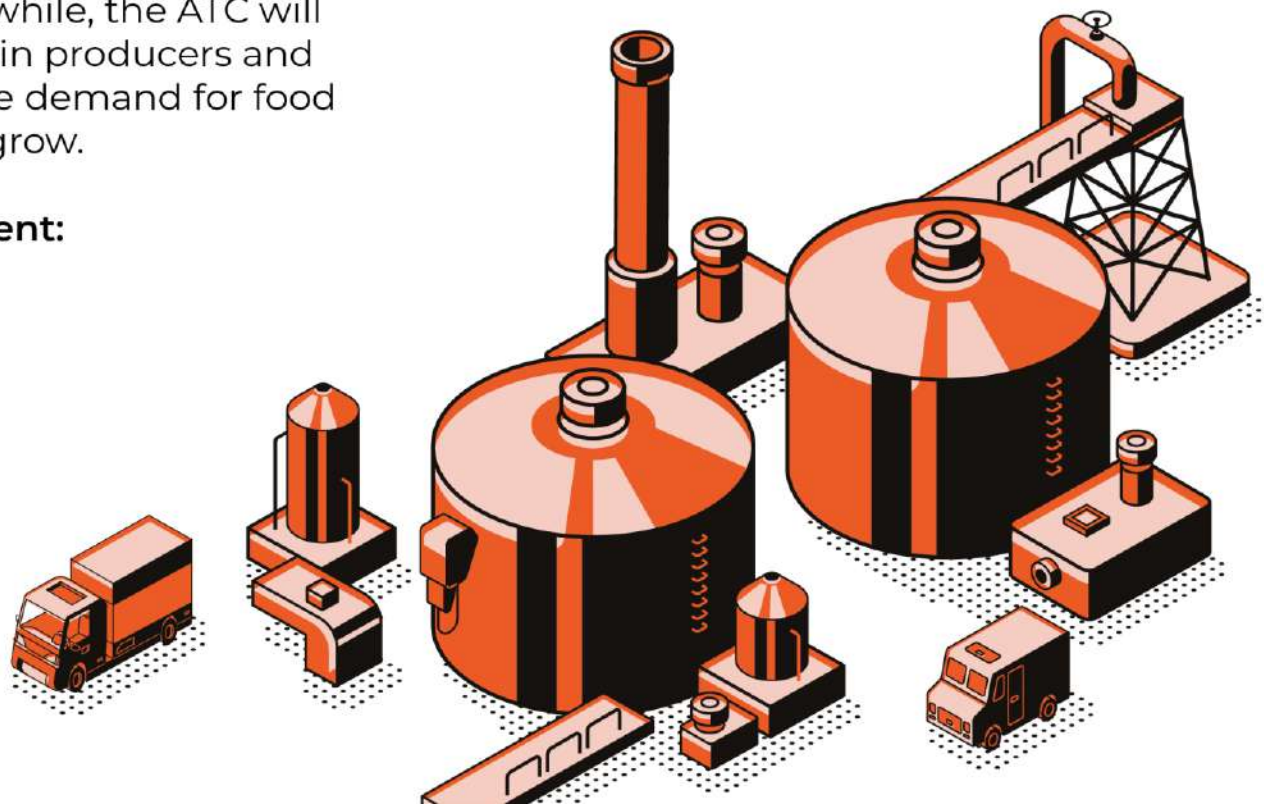

Agriculture

Business Development

As the population of the world is increasing, the demand for food will be different. That is why the ATC tries to expand its business steadily to respond to this growing population and develop new markets and opportunities. As the focus of our business is CIS and Black Sea region, we plan to expand our business to South America and India, too. Meanwhile, the ATC will develop its business with largest grain producers and suppliers in the world to supply huge demand for food in countries where it is expected to grow.

Subsidiary companies in this segment:

- Agro Tamin Co, in Iran
- Arsin Tahlil Co, in Iran

Minerals & Chemicals

The ATC is actively involved in the chemicals and minerals business and handles a wide variety of products domestically and globally, including **Kaolin, Ball clay, Ammonium sulfate, Potassium sulfate, Petrochemicals, Specialty chemicals, and agricultural chemicals.**

The ATC's greatest success in this segment is its **ability to supply wide range of products for different industries and accessing market to be able to secure producers and investors profit.** Utilizing our global network, appropriate logistics, and warehousing have resulted in customers satisfaction.

Minerals & Chemicals

Business Unit

Chemicals Unit

This unit trades and distributes required market and industry products domestically or globally. The major traded products include:

- Boric acid
- Ammonium sulfate
- Potassium sulfate
- Petrochemicals

Minerals unit

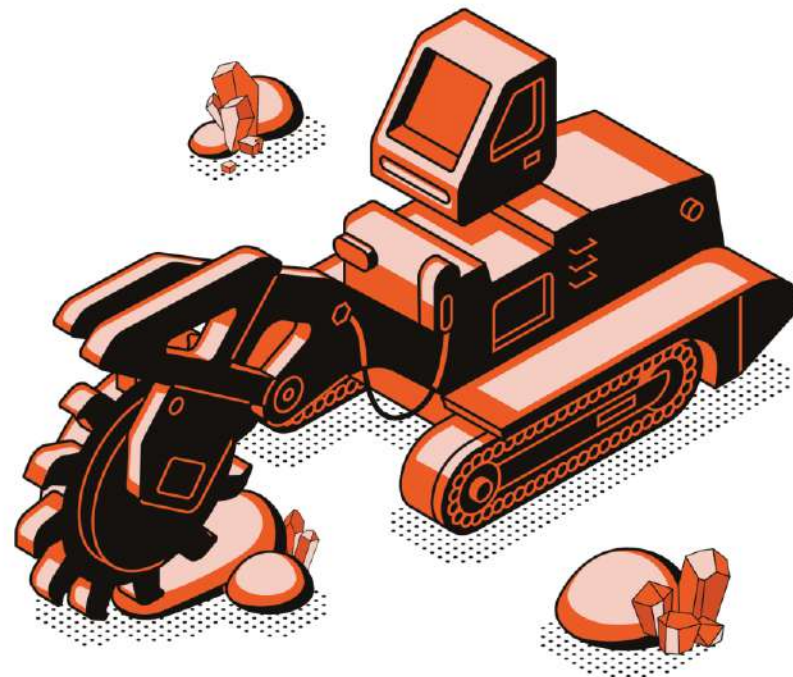

Our rigorous experts in this unit, analyze market and industry opportunities to help our customers feel satisfied. Main products include: Natural Zeolite, which is obtained from Iranian mines with more than 90% Clinoptilolite. Densely rich in mineral content and effectively removes poisonous chemical compounds like Ammonia. This product is highly beneficial for ornamental fish, animals, and aquatic plants. Meanwhile, they are used in water refinement systems, swimming pools, odor absorbent, and farm animals' feed additives.

Minerals & Chemicals

Our Strength

The ATC is the holder of some creditable “Exclusive Brands” in importation of **Boric acid, Kaolin, Ball clay, Ammonium sulfate, and Potassium sulfate** related to Iranian markets, where demand of chemicals and minerals is rising due to modernization and developing of industries and markets.

Minerals & Chemicals

New Market creation

Our team has precise knowledge of consumer markets in different industries related to chemicals and minerals. We believe in partnership through trading businesses. As the demand for these products is rising, the ATC can enter into agreements and acts as a partner for global producers as following:

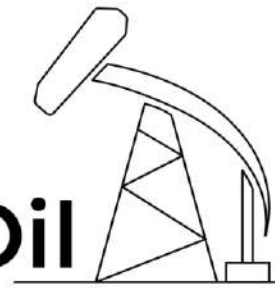

- Exclusive agent performance
- Marketing and sales
- Logistics
- Brand management
- Quality control services
- Research and project implementation

Subsidiary company in this segment:

- Aytak Tafakor Co (ATC) in Iran

Energy & Oil

The ATC operates in a wide range of energy and oil related products, both locally and globally. It trades products which include Petroleum, Mazut, Bitumen, Coke, and coal.

The ATC group has invested in oil and energy industry in Russia and Iran due to diversify sources of these two countries. This has made ATC capable of exporting products, including Crude oil, Bitumen, and Mazut. The ATC, however, is investing in green fuel in order to harm the environment as little as possible.

The ATC will continue to carry on the operation of its present projects and also plans to participate in new projects. We are seeking to recognize new ways to increase production and utilize our relationship in Iran and Russia, which are so rich in natural resources and energy. We are focused on both investment and trading activities and we also try to strengthen our previous and present trade.

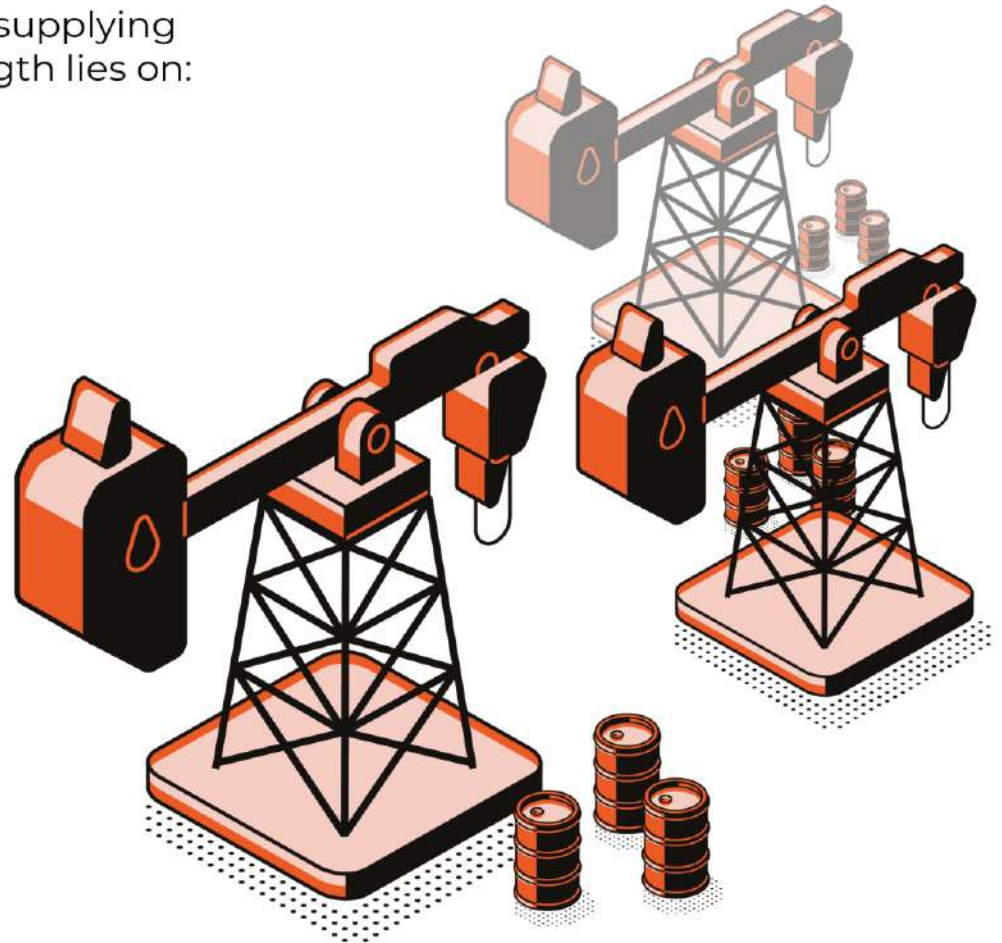

Energy & Oil

Our Strength

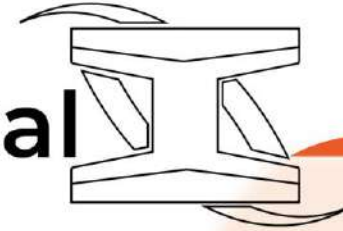

The ATC has been playing an important role in supplying resources and trading them globally. Our strength lies on:

- Skilled technical and engineering team
- Efficient logistics
- Strong networks
- Accessibility to resources in Iran and Russia
- Marketing and sales

Steel & Metal

The ATC trades high quality steel products in **Russia and Ukraine**. Our subsidiary companies, located in **Moscow and Kiev**, export steel billets and steel pipes worldwide. They also trade high quantity of steel scrap overseas.

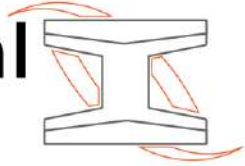

The ATC steel and metal group trades and supplies high quality products from Russia and Ukraine, where we are actively present. To expand our trading activities, we have finished acquisition of **Asian Trade Capital company**, which is registered in Dubai, to concentrate on this segment.

Through our business development, logistics, metal supply, and steel products we enhance trading to ensure their supplies, which are the utmost importance for involved industries. Our customers depend on our stable supply of products, which is vital for infrastructure as a base for economic development in their countries as steel products are omnipresent in different industries.

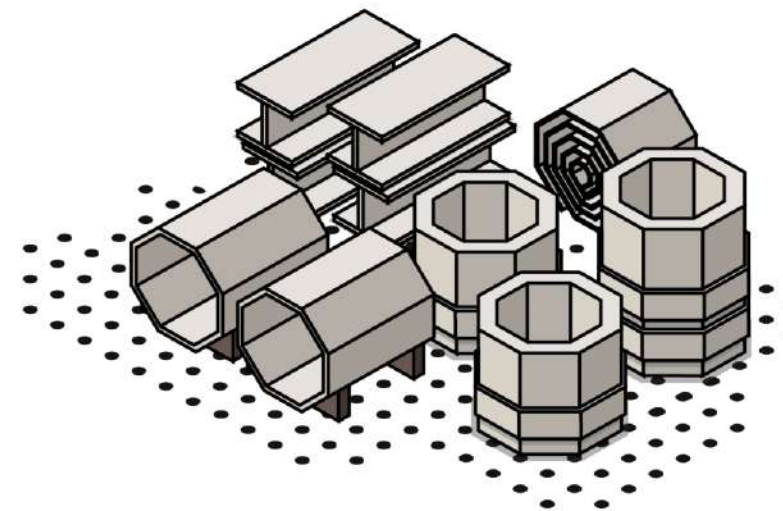

Steel & Metal

Our Strength

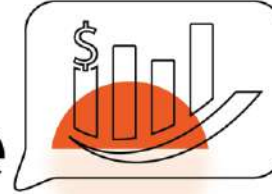

The ATC has been playing an important role in supplying resources and trading them globally. Our strength lies on:

- Skilled technical and engineering team
- Efficient logistics
- Strong networks
- Accessibility to resources in Iran and Russia
- Marketing and sales

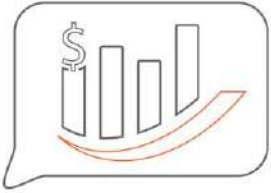

Business & Finance

Having experts and analysts helps the ATC to be able to assist you in implementing your projects and investments in areas covered by the group. From the assessment of find to cooperation, in all stages of the projects, you can count on our professional team.

Business & Finance

By keeping our strong points and with knowledgeable experts, engineers, and project managers who are involved in these activities, the ATC can assist international investors in achieving their goals. As we are concentrating on our own operations in our segments, we are also trying to participate in investments and absorbing activities worldwide.

Ideal destination to attract investments and projects can be mostly where we have access to precise data and manage operations globally.

Business partners all over the world, investors, and traders can rely on the ATC group to achieve their objectives, particularly in the segments we have already gained credit and reputation including:

- Minerals
- Steel and metals
- Energy and oil

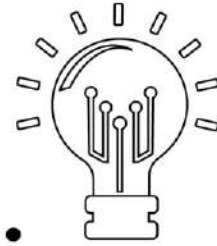

Logistics

Utilizing reliable and effective logistical infrastructure can optimize trading of grains. We can deliver our products to our customers everywhere and right on time via rail, road, and sea.

Chartering and managing ships for bulk transportation of commodities can be done on a daily basis according to customers needs. We are able to coordinate shipments through strong connections. Regarding logistics, our team is experienced and committed to be reliable. Moreover, timely delivery is outstanding.

A message from CEO

I would like to thank all our supportive customers and hardworking team.

Back to our history, we have faced up to a lot of challenges which needed patience and professionalism to be solved. These ups and downs taught us valuable experience to be passionate about improving. Today, our worldwide activity is the best evidence to confirm the details.

About US

Although we have been achieved a lot since we started, we have been continuing our hard work to promote the ATC. We have overwhelming desire to grow, but we always follow the notion of “Fair Trade” and “Greener Environment”.

About US

Overview

Founded in 2006, the ATC has been highly specialized in trading grain, energy, steel, minerals, and chemicals globally.

According to our risk management and strong connection worldwide, the ATC has become one of the largest privately-owned holding companies in the world. From the outset, our major goal was to be a well-known company in **agricultural commodities, oil, steel, minerals, and chemicals**.

Our main focus has been on trading particular commodities such as **wheat, barley, corn, soybean, edible oil, and oilseeds**. Meanwhile, the company's assets like grain silos in Russia, Kazakhstan, and Iranian ports enable us to handle the process well.

Having 30 offices working together in different parts of the world allow the ATC group to be linked to its subsidiary companies and clients in a quite straightforward process. Moreover, our head office is located in Iran.

Business Development

We believe in strategies which help us cooperate with the world through partnership, investment, and trading opportunities.

The ATC business development team consists of experts, professionals, and analysts who are experienced and knowledgeable in what we need, like agribusiness, oil, chemicals, minerals, metals, and financing. To reach our goals and grow, our skillful experts enable us to recognize opportunities based on partnership and increase cooperation to achieve them.

We have already developed noticeable strategies and add them into our different fields from the beginning up to now. This is why we are a well-known company and prepared in commodity trading.

Without any doubt, cooperation and partnership with participants in grain, energy, oil, minerals, and trading in local and global markets have been key factors in our success. We will keep up the good work to put higher value on our company.

Corporate Responsibility

Responsibility is proudly observed throughout all our activities, no matter where we are. **“Fair Trade”** and **“Greener Environment”** are our general approaches worldwide and we strictly adhere to them. Our group tries to have highest standards for the people's health and the environment. The ATC has tried to trade green fuel to encourage the application of clean fuel.

It is our duty to care about people and environment and lend them a helping hand to be **healthier and safer**. Therefore, the ATC tries to give you this opportunity to have a better life.

The ATC has always tried to be responsible for the area it has been located in. We employ local people to put them in charge of our offices. This way, we can have a small role in unemployment reduction in that community.

The ATC's policy is to act responsibly towards all transactions and business agreements with its partners, suppliers, buyers, and sellers in all the stages of trading. We consider every responsibility upon us related to our partners and business traders so seriously and try to finalize it and make it more effective.
